EUROSTAMP TOOLING

the Italian excellence

**Eurostamp Tooling significa qualità,
competenza e precisione.**

Dal 1970 produciamo utensili e attrezzature per la piegatura straordinariamente precisi, offrendo soluzioni di estrema qualità per tutti quei clienti che richiedono costantemente massimi livelli di performance e affidabilità.

***Eurostamp Tooling means quality,
competence, accuracy.***

Since 1970 we have been manufacturing outstandingly accurate tooling and providing top quality solutions to all those customers who require the highest levels of performance and reliability.

Eurostamp Tooling,
the Italian Excellence

CHI SIAMO

L'azienda è stata creata nel 1970 e, sin da allora, siamo orgogliosi di produrre e commercializzare utensili e attrezzature per la piegatura altamente performanti, affidabili e caratterizzati dai più elevati standard di qualità. Il nostro parco macchine utensili a elevata tecnologia e il magazzino con ampia disponibilità ci permettono di soddisfare ogni esigenza e richiesta speciale.

I nostri utensili sono realizzati con acciai al carbonio e acciai speciali di provenienza italiana, con tempra a induzione sulle parti usurabili che ne garantisce una durezza di 55-60 HRC.

Offriamo un'ampia gamma di accessori per presse piegatrici: adattatori inferiori e superiori, sistemi di bloccaggio manuali e pneumatici.

Il nostro ufficio tecnico interno, inoltre, è in grado di studiare i progetti di piegatura personalizzati in modo tempestivo e accurato.

WHO WE ARE

Our company was born in 1970 and, since then, we have been proudly producing and marketing high performing and reliable press brake tooling distinguished by the highest quality standards. Our production department equipped with high-tech machine tools, complimented by our wide range inventory, allows us to meet our customer needs and expectations for standard and special tool requirements.

Our tooling is produced by using medium carbon steel C45, both raw and tempered, and Italian high-quality chrome molybdenum steel.

All our tooling is then hardened by induction (HRC 55-60) up to 3mm depth from the working surface. In addition to providing high quality Press Brake Tooling, we also provide a large range of accessories for press brakes: lower and upper adaptors, manual or pneumatic clamping systems and more.

Our in-house technical department have the knowledge, experience, and expertise to develop fully tailored bending projects in a timely and accurate manner.

LA NOSTRA FILOSOFIA

Eurostamp Tooling è un'azienda con cuore italiano e anima internazionale; abbiamo deciso di concentrarci e specializzarci esclusivamente nella produzione e sviluppo degli utensili di piegatura, settore in cui abbiamo sviluppato la più alta tecnologia applicata a ciascuno dei processi interni.

Il nostro reparto produttivo pone la massima attenzione alla cura dei dettagli, alla precisione e all'accurato controllo della qualità con una ispirazione artigianale: selezioniamo i migliori fornitori italiani di materia prima, e investiamo costantemente in attrezzature di qualità e in spazi di stoccaggio di ampio respiro. Poniamo una fortissima attenzione alla formazione dello staff tecnico e produttivo ed investiamo costantemente in ricerca e sviluppo perché crediamo fortemente che il modo migliore per soddisfare i nostri clienti sia il superamento delle loro aspettative con soluzioni innovative e un supporto pre e post vendita di elevato livello. Il team commerciale lavora quotidianamente a fianco dello staff tecnico e produttivo per diffondere ovunque la nostra filosofia di marchio.

OUR PHILOSOPHY

Eurostamp tooling is an Italian company with an international "soul". Since the beginning we chose to focus all of our attention only on the engineering and manufacturing of press brake tooling, so we invested our resources on the state-of-art technologies applied to each of our internal processes.

Our production department takes great care to every detail, to the highest precision and to the accurate quality control. We are cooperating with the best raw material suppliers among the Italian market and we are constantly investing in new production technologies. Our finished product is then stocked in our wide and organized warehouse, ready for being handled by our skilled logistic resources. We put the highest care to the training of our production and engineering staff and to our policy of research and development because we are aware that this is the best way for overcoming our customer expectations with innovative solutions and with the highest level of pre- and post-sales support. Our sales staff is working daily beside our production and our engineering departments with the mission to spread worldwide our brand philosophy.

LE COMPETENZE

Gli specialisti che compongono il nostro staff controllano ogni fase produttiva, dalla scelta delle leghe e degli acciai grezzi, alle procedure di fresatura, tempra e rettifica di ogni pezzo. Usiamo acciaio al 100% italiano per garantire massima precisione e caratteristiche meccaniche ad alto standard qualitativo.

OUR COMPETENCES

Our specialized staff takes care of each production phase, from choosing the best kind of steel to the procedures for machining, hardening and grinding each product with the best results. We are utilizing only 100% Italian source steel for granting always the conformity to the most severe standards specifications.

AMADA PROMECAM STYLE

EUROPEAN STYLE

Gli utensili superiori ed inferiori elencati in questa sezione possono essere installati sulle piegatrici:

ACL, Accurpress, AM Machinery, Amada, Atlantic, Adira, Baykal, BL, Boschert, Boutillon, Bystronic-Beyeler Euro-B, Coastone, Colgar, Dener, Deratech, Durmazlar, Ermaksan, Farina, Gade, Gasparini, Gizelis, Haco, Hindustan, Iturrospe, Jfy, JMT, LFK, Metfab, MVD, Oriance, Prima Power, Promecam, Rico, Salvagnini, Schiavi, SMD, Sorg, Somo, Vicla, Vimercati, Warcom, Yangli, Yawei, Ysde su tutte le piegatrici equipaggiate con sistemi di connessione stile Europeo (stile Amada/Promecam).

Questi utensili possono essere installati anche su altre piegatrici tramite adattatori superiori e inferiori.

Upper and lower tooling listed on this section could be installed on the following press brakes:

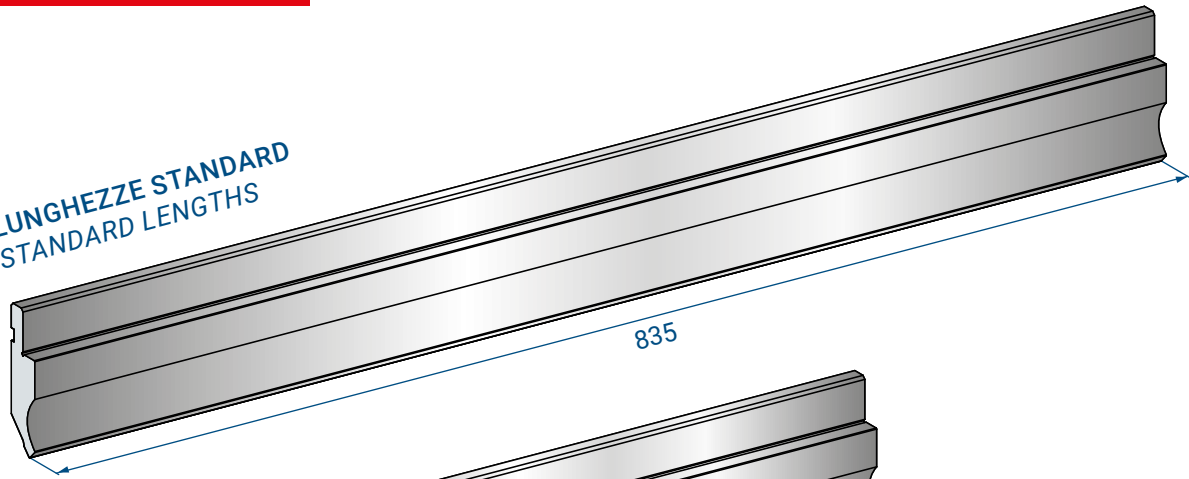

ACL, Accurpress, AM Machinery, Amada, Atlantic, Adira, Baykal, BL, Boschert, Boutillon, Bystronic-Beyeler Euro-B, Coastone, Colgar, Dener, Deratech, Durmazlar, Ermaksan, Farina, Gade, Gasparini, Gizelis, Haco, Hindustan, Iturrospe, Jfy, JMT, LFK, Metfab, MVD, Oriance, Prima Power, Promecam, Rico, Salvagnini, Schiavi, SMD, Sorg, Somo, Vicla, Vimercati, Warcom, Yangli, Yawei, Ysd, ecc.

These tooling could also be installed on other press brakes by using the appropriate upper and lower adapters.

TRUMPF STYLE

Gli utensili superiori e inferiori elencati in questa sezione possono essere installati sulle piegatrici:

ACL, Accurpress, AM Machinery, Amada, Atlantic, Adira, Baykal, BL, Boschert, Boutillon, Bystronic-Beyeler Euro-B, Coastone, Colgar, Dener, Deratech, Durmazlar, Ermaksan, Farina, Gade, Gasparini, Gizelis, Haco, Hindustan, Iturrospe, Jfy, JMT, LFK, Metfab, MVD, Oriance, Prima Power, Promecam, Rico, Salvagnini, Schiavi, SMD, Sorg, Somo, Vicla, Vimercati, Warcom, Yangli, Yawei, Ysd, ecc.

Questi utensili possono essere installati anche su altre piegatrici tramite adattatori superiori e inferiori

The upper and lower tooling listed in this section could be installed on the following press brakes:

Trumpf, Darley, Safan, and other press brakes equipped with Wila style clamping system.

These tooling could even be installed on press brakes equipped with different clamping system by choosing the appropriate upper and lower adapters.

WILA STYLE

Gli utensili superiori e inferiori elencati in questa sezione possono essere installati sulle piegatrici:

Trumpf, LVD , Darley, Safan e su altre piegatrici equipaggiate con Sistema NSCL.

Questi utensili possono essere installati anche su altre piegatrici tramite adattatori superiori e inferiori.

The upper and lower tooling listed in this section could be installed on the following press brakes:

Trumpf, Darley, Safan, and other press brakes equipped with Wila style clamping system.

They could even be installed on press brakes equipped with different clamping system by choosing the appropriate upper and lower adapters.

IL PULSANTE DI SICUREZZA VIENE MONTATO STANDARD SU TUTTI GLI UTENSILI CON PESO FINO A 12,5 KG

THE SAFETY BUTTON IS A STANDARD SUPPLY ON ALL TOOLING UP TO 12.5 KG WEIGH

BYSTRONIC STYLE

Gli utensili superiori e inferiori elencati in questa sezione possono essere installati sulle piegatrici Bystronic/Beyeler dotate dei seguenti stili di connessione:

Bystronic/Beyeler Type RFA
Bystronic/Beyeler Type RF
Bystronic/Beyeler Type R

Questi utensili possono essere installati anche su altre piegatrici tramite adattatori superiori e inferiori.

Upper and lower tooling listed on this section could be installed on the Bystronic/Beyeler press brakes equipped with the following clamping styles:

*Bystronic/Beyeler Type RFA
Bystronic/Beyeler Type RF
Bystronic/Beyeler Type R*

These tooling could also be installed on other press brakes by using the appropriate upper and lower adapters.

COMPLETO SISTEMA DI CONNESSIONE PER UTENSILI SUPERIORI STILE EUROPEO (STILE AMADA/PROMECAM) COMPLETE CLAMPING SYSTEM FOR EUROPEAN STYLE TOOLING (AMADA/PROMECAM STYLE)

PROCESSO DI SOSTITUZIONE UTENSILI CON SISTEMI TRADIZIONALI

Il sistema tradizionale prevede di installare gli utensili superiori tramite staffe di sicurezza avvitate agli intermediari connessi alla tavola superiore.

Il dente presente sulla staffa dell'intermediario lavora nella cava di sicurezza fresata sul punzone per impedirne la caduta accidentale, ma costringe ad inserire/estrarre ogni utensile dal lato macchina e a trascinarlo in posizione operativa.

Quando i punzoni sono posizionati correttamente è necessario pre-serrare le staffe, poi "chiudendo" la macchina, si sollevano e spingono gli utensili a contatto con gli intermediari per allinearli ottimamente.

Il tempo per eseguire questa operazione viene sottratto al tempo di piegatura e può assumere una importanza rilevante nel calcolo della produttività.

ACTUAL TOOLING REPLACEMENT PROCEDURE

The standard system requires to install the upper tooling through safety clamps screwed on the intermediates connected to the upper machine table.

The clamps safety tang engages into the safety groove machined on the punch front: this combination ensures the tools will not drop out of the clamp when opened to replace them. In order to remove or insert punch tooling, one has to slide the tools horizontally, along the machine length, to the left or right from/to its working position. Note the tools cannot be removed or inserted vertically with this safety feature.

Once the new punches are correctly inserted it is necessary to follow the procedure below:

slightly tighten all the clamp screws,

lower the upper beam and push the tooling against their reference surface (bottom side of intermediate), this ensures alignment of the punch tooling,

finally, firmly tighten all the clamp screws

The average time required to perform the above operation is deducted from the fabrication time, the time taken can be of high importance and relevance when productivity output is a consideration.

L'INNOVAZIONE EUROGRIP / THE EUROGRIP INNOVATION

La struttura meccanica della staffa Eurogrip è stata ingegnerizzata per consentire:

- l'inserimento/rimozione del punzone in senso verticale (anziché dal lato macchina) e, contemporaneamente, la garanzia del medesimo elevato livello di sicurezza.
- Il sollevamento del punzone durante la fase di chiusura per arrivare ad allinearli nel momento del bloccaggio finale

The main innovation is the Eurogrip clamp mechanical structure, engineered for allowing:

- the removal and insertion of punches in vertical direction (instead of sliding them left and right) and, at the same time, for granting the same high safety level.
- The punch lifting during the clamping phase, in order to achieve its right alignment when the clamp is locked.

IL RISPARMIO DI TEMPO / THE TIME SAVING

La tabella mostra i tempi medi necessari per ogni fase dell'operazione di rimozione e sostituzione utensili superiori su una piegatrice de 3 metri (15 intermediari); il suo scopo è la valutazione dei vantaggi offerti dal nuovo sistema.

Comparazione tempi stimati per ogni fase della sostituzione utensili superiori (piegatrice da 3 metri con 15 intermedi)

he table shows the average time required for each phase of any upper tooling removal and replacement operation on a 3-meter-long press brake (15 intermediates); its purpose is the evaluation of the advantages offered by the new system.

Comparison of estimated time required for each phase of an upper tooling replacement operation (press brake 3 meter long - 15 intermediates)

TEMPO RICHiesto CON SISTEMA EUROGRIP MANUALE

AVERAGE TIME REQUIRED WITH EUROGRIP MANUAL SYSTEM

circa 9,5 minuti
about 9,5 minutes

TEMPO RICHiesto CON SISTEMA EUROGRIP PNEUMATICO

AVERAGE TIME REQUIRED WITH EUROGRIP PNEUMATIC SYSTEM

circa 3,0 minuti (-70%)
about 3,0 minutes (-70%)

TEMPO RICHiesto CON SISTEMA TRADIZIONALE

AVERAGE TIME WITH STANDARD SYSTEM

circa 1,5 minuti (-85%)
about 1,5 minutes (-85%)

LA PERCENTUALE DI TEMPO NECESSARIO PER UNA SOLA OPERAZIONE DI CAMBIO UTENSILI RISPETTO A UN'ORA DI LAVORO EFFETTIVO COSTITUISCE, RISPETTIVAMENTE:

- 16% con il Sistema Tradizionale
- 5% con Eurogrip Manuale
- 2,5% con Eurogrip Pneumatico

THE SHARE OF TIME REQUIRED FOR EACH TOOL REPLACEMENT OPERATION OVER A 1-HOUR FABRICATION TIME IS, RESPECTIVELY:

- 16% for the standard system;
- 5% with Eurogrip Manual
- 2,5% with Eurogrip Pneumatic

TEMPO TOTALE PREVISTO / TOTAL ESTIMATED TIME			570 s	180 s	94 s

INSERIMENTO PUNZONE PUNCH LOADING

Quando la staffa è in posizione di apertura, permette l'inserimento del punzone in senso verticale verso l'alto fino a quando la cava di sicurezza incontra il meccanismo di sicurezza della staffa, che lo aggancia e lo mantiene sollevato.

Durante il movimento di chiusura della staffa, il meccanismo di sicurezza solleva il punzone fino al piano di riferimento (base dell'intermedio) e lo mantiene in posizione fino alla completa chiusura della staffa che blocca il punzone in posizione.

When the clamp is in open position, it allows the punch insertion in vertical upward direction until when the punch safety groove engages the clamp safety fingers, that hooks it and keeps the punch in position.

During the clamp closing stroke, the safety fingers lifts up the punch until intermediate reference surface and keeps it in the right position until the end of clamp closing movement that locks the punch.

RIMOZIONE PUNZONE PUNCH UNLOADING

Quando la staffa viene aperta, il punzone viene sbloccato e scende fino ad arrestarsi perché rimane agganciato al meccanismo di sicurezza.

A questo punto è sufficiente sollevare manualmente il punzone e spingere la sua punta verso l'interno della macchina per liberarlo dal meccanismo di sicurezza e sfilarlo in senso verticale verso il basso.

When the clamp is opened, it unlocks the punch that can then move downwards until the point where it can remain hooked in against the safety fingers.

Now it is possible to manually lift the punch upwards and push on its bottom side to disengage it from the safety fingers and removing it in vertical downward direction.

LA GAMMA DI PRODOTTI EUROGRIP PER LA CONNESSIONE DEGLI UTENSILI SUPERIORI THE EUROGRIP RANGE FOR THE UPPER TOOL CLAMPING

L'innovativa staffa Eurogrip è alla base della gamma completa di soluzioni sviluppata da Eurostamp, orientata agli equipaggiamenti standard delle piegatrici e alle esigenze specifiche di clienti.

La gamma include Sistemi Manuali e Pneumatici;

ciascun Sistema è disponibile in due Versioni (EASY e TOP);

finalmente, ogni versione comprende due Modelli, in base alle dimensioni degli intermediari originali

The innovative Eurogrip clamp is the basis of the complete range of solutions developed by Eurostamp, in line with the press brakes standard equipment and suited to the customer needs.

The range includes Manual and Pneumatic, each available in two versions (EASY and TOP):

Each version includes two models, according to the dimension of the original intermediates

SISTEMI DI STAFFAGGIO MANUALI - INTRODUZIONE MANUAL CLAMPING SYSTEM - INTRODUCTION

Ogni staffa viene operata da una comoda e robusta leva a scomparsa posizionata sulla parte superiore della staffa per evitare qualsiasi interferenza contro la lamiera durante il processo di piegatura.

Lo stesso principio di funzionamento è stato applicato anche ad un adattatore superiore che consente l'installazione di punzoni in stile Trumpf e Wila su macchine con sistema di connessione in stile Europeo (stile Amada/Promecam)

Each clamp is individually operated by a comfortable and powerful handle, conveniently located on the top in order to avoid any interference with the product being fabricated.

We applied a similar solution also to an upper adapter that allows the installation of Wila/Trumpf style punches on machines equipped with European style (Amada/Promecam style) clamping system

Modello / Model

4389
(M-EASY Z1)

SISTEMA MANUALE EUROGRIP M-EASY:
STAFFA PER RETROFIT SU INTERMEDIARIO Z1

MANUAL SYSTEM M-EASY:
FRONT CLAMP FOR RETROFIT OF Z1 STYLE INTERMEDIATE

150 mm 0,8 kg

DESCRIZIONE

Staffa frontale da installare al posto di quella esistente.

SPECIFICHE TECNICHE

Solo su intermediari conformi Z1 (altezza 100mm; corpo 27mm; asse 7mm): per favore verificare la conformità dell'intermediario a tutte le dimensioni del disegno su questa pagina.

DESCRIPTION

Front clamp replacement, installed over the existing intermediate in place of the "standard one".

TECHNICAL SPECIFICATIONS

Only on Z1 style intermediates (height 100mm; body width 27mm; bending axis located at 7mm). All dimensions of the intermediates need to be verified and confirmed as per the drawings on this page.

Modello / Model

4409
(M-EASY Z2)

SISTEMA MANUALE EUROGRIP M-EASY: ASSIEME DI STAFFA + PIASTRA ANTERIORE PER RETROFIT SU INTERMEDIARIO Z2

MANUAL SYSTEM M-EASY: ASSEMBLY OF CLAMP + FRONT PLATE FOR RETROFIT OF Z2 STYLE INTERMEDIATE

150 mm 1,8 kg

DESCRIZIONE

Assieme costituito dalla staffa 4389 e da una piastra anteriore, che deve essere installata sul corpo principale dell'intermediario esistente.

SPECIFICHE TECNICHE

Solo su intermediari conformi Z2 (altezza minima 120mm; corpo 40mm; asse 20mm). Per favore verificare la conformità dell'intermediario a tutte le dimensioni del disegno su questa pagina.

DESCRIPTION

Assembly made up with clamp model 4389 and by a replacement front plate that must be installed onto the original intermediate.

TECHNICAL SPECIFICATIONS

Only on Z2 style intermediates (minimum height 120mm; body width 40mm; bending axis located at 20mm). All dimensions of the intermediates need to be verified and confirmed as per the drawings on this page.

Modello / Model

4390
(M-TOP Z1)

SISTEMA MANUALE EUROGRIP M-TOP:
STAFFA ASSEMBLATA SU INTERMEDIO SPECIFICO Z1

EUROGRIP MANUAL SYSTEM M-TOP:
FRONT CLAMP ASSEMBLED ON SPECIFIC Z1 STYLE INTERMEDIATE

150 mm 4,8 kg

DESCRIZIONE

Assieme completo costituito da una speciale staffa manuale (dimensioni maggiorate) installata su un intermedio speciale (Z1) di alta qualità, disegnato per alloggiare la staffa maggiorata.

Soluzione privilegiata nei casi in cui sia necessario sostituire gli intermedi esistenti perché danneggiati e quando le dimensioni dell'intermedio esistente non consentano l'utilizzo di M-EASY.

Il codice 4390 è già predisposto per l'installazione delle staffe manuali posteriori opzionali codice 4404 (fori passanti).

SPECIFICHE TECNICHE

Solo su macchine predisposte ad installare intermedi di tipo Z1 (altezza 100mm; corpo 27mm; asse 7mm): per favore verificare la conformità dell'intermediario esistente a tutte le dimensioni del disegno su questa pagina.

DESCRIPTION

Full intermediate assembly, made up of a special manual clamp (bigger dimension) already installed over a special, superior quality (Z1) intermediate body, designed for the movement of the operating fingers.

This solution is the best choice when a new set of intermediates is replacing the old ones (damaged or worn out) or when the original intermediate dimension does not allow to utilize the M-EASY.

The code 4390 is already set for installing the optional rear clamp manually operated code 4404 (pass-through holes).

TECHNICAL SPECIFICATIONS

Only on machines equipped for Z1 style intermediates (height 100mm; body width 27mm; bending axis located at 7mm). All dimensions of the intermediates need to be verified and confirmed as per the drawings on this page.

Modello / Model

4400
(M-TOP Z2)

SISTEMA MANUALE EUROGRIP M-TOP: STAFFA ASSEMBLATA SU INTERMEDIO SPECIFICO Z2

EUROGRIP MANUAL SYSTEM M-TOP: FRONT CLAMP ASSEMBLED ON SPECIFIC Z2 STYLE INTERMEDIATE

150 mm 5,5 kg

DESCRIZIONE

Assieme completo costituito da una speciale staffa manuale (dimensioni maggiorate) installata su un intermedio speciale (Z2) di alta qualità disegnato per alloggiare la staffa maggiorata.

Soluzione privilegiata nei casi in cui sia necessario sostituire gli intermedi esistenti perché e quando danneggiati le dimensioni dell'intermedio esistente non consentano l'utilizzo di M-EASY.

Il codice 4400 è già predisposto per l'installazione delle staffe manuali posteriori opzionali codice 4404 (fori passanti).

SPECIFICHE TECNICHE

Solo su macchine predisposte ad installare intermedi di tipo Z2 (altezza 120mm; corpo 40mm; asse 20mm): per favore verificare la conformità dell'intermediario esistente a tutte le dimensioni del disegno su questa pagina. Peso=5,5Kg

DESCRIPTION

Full intermediate assembly, made up of a special manual clamp (bigger dimension) already installed over a special, superior quality (Z2) intermediate body, conveniently machined for the movement of the operating fingers.

This solution is the best choice when a new set of intermediates is replacing the old ones (damaged or worn out) or when the original intermediate dimension does not allow to utilize the M-EASY.

The code 4400 is already set for installing the optional rear clamp manually operated code 4404 (pass-through holes).

TECHNICAL SPECIFICATIONS

Only on machines equipped for Z2 style intermediates (height 120mm; body width 40mm; bending axis located at 7mm). All dimensions of the intermediates need to be verified and confirmed as per the drawings on this page. Weight=5,5Kg

Modello / Model

4393
(M-WDP Z1)

SISTEMA MANUALE EUROGRIP M-WPD: ADATTATORE SUPERIORE DA STILE AMADA (TIPO Z1) A STILE WILA/TRUMPF

EUROGRIP MANUAL SYSTEM M-WDP: UPPER ADAPTER FROM AMADA STYLE (Z1 TYPE) TO WILA/TRUMPF STYLE

150 mm 6,7 kg

DESCRIZIONE

Adattatore speciale da stile standard Amada/Promecam (stile Europeo) a stile standard Trumpf/Wila.

La staffa anteriore - operata da una leva a scomparsa - permette l'inserimento, la rimozione, l'allineamento e il bloccaggio di utensili conformi allo standard Trumpf/Wila su macchine con tavola superiore in stile Europeo (stile Amada Promecam).

SPECIFICHE TECNICHE

Solo su macchine predisposte ad installare intermedi di tipo Z1 (altezza 100mm; corpo 27mm; asse 7mm): per favore verificare la conformità dell'intermediario esistente a tutte le dimensioni del disegno su questa pagina. Peso=6,7Kg.

DESCRIPTION

Upper adapter from European style (Amada/Promecam style) to Trumpf/Wila style.

The front clamp, operated by a foldaway handle allows the installation; the removal; the alignment and the locking of Trumpf/Wila style top tooling on a press brake equipped with European style clamping system.

TECHNICAL SPECIFICATIONS

Only on machines equipped for Z1 style intermediates (height 100mm; body width 27mm; bending axis located at 7mm). All dimensions of the intermediates need to be verified and confirmed as per the drawings on this page.

SISTEMI DI STAFFAGGIO MANUALI – DISPOSITIVI OPZIONALI MANUAL CLAMPING SYSTEM – OPTIONAL ADD-ONS

Modello / Model

4408

150 mm 0,7 kg

STAFFA POSTERIORE OPZIONALE, ESCLUSIVA PER MODELLI M-EASY

Per installare punzoni con orientamento "rovesciato" su intermedi equipaggiati con sistemi M-EASY (4389 e 4409).

La staffa posteriore viene operata da fronte macchina agendo su due viti a brugola.

Per installare la staffa opzionale è necessario eseguire due fori passanti diametro 9mm sul corpo dell'intermedio.

OPTIONAL REAR CLAMP EXCLUSIVELY FOR M-EASY MODELS

For inserting the punches in "reverse" direction on intermediates equipped with M-EASY clamps (4389 e 4409).

The rear clamp is operated by standing on the machine front and through two allen-key bolts.

For mounting the rear clamp, two additional holes Ø9mm need to be drilled on the intermediate body.

Modello / Model

4404

150 mm 0,8 kg

STAFFA POSTERIORE OPZIONALE, PER MODELLI M-TOP; P-EASY; P-TOP

Per installare punzoni con orientamento "rovesciato" su intermedi equipaggiati con sistemi M-TOP; P-EASY; P-TOP

La staffa posteriore viene operata da fronte macchina agendo su due viti a brugola.

Tutti i modelli M-TOP; P-EASY; P-TOP sono forniti completi di fori passanti, per cui non è necessaria alcuna lavorazione aggiuntiva per installare la staffa.

OPTIONAL REAR CLAMP, FOR MODELS M-TOP; P-EASY; P-TOP.

For inserting the punches in "reverse" direction on intermediates equipped with all the products M-TOP; P-EASY; P-TOP.

The rear clamp is operated by standing on the machine front and through two allen bolts.

All the models M-TOP; P-EASY; P-TOP are supplied with the pass-through holes already drilled on - ne need for any additional operation.

SISTEMI DI STAFFAGGIO PNEUMATICI - INTRODUZIONE PNEUMATIC CLAMPING SYSTEM - INTRODUCTION

Tutte le staffe presenti sulla tavola superiore sono operate tramite aria compressa, controllata da una centralina e trasferita tramite tubi che collegano in serie gli intermedi.

La gamma di sistemi pneumatici include un sistema analogo per gli utensili inferiori.

All of the clamps located on the machine upper table are operated by compressed air, managed by a pneumatic control unit and transferred through pipes that connect serially the intermediates.

The pneumatic system product range includes also a solution for the pneumatic clamping of lower tooling.

1 STAFFA SU TAVOLA
SUPERIORE (fissa)
TOP BEAM CLAMP (fixed)

2 INTERMEDIARIO (traslabile a
destra/sinistra e rimovibile)
INTERMEDIATE (shiftable right
or left and removable)

3 STAFFA SU INTERMEDIARIO
INTERMEDIATE CLAMP

Il Sistema pneumatico superiore Eurogrip sostituisce alcuni dei componenti standard forniti assieme alla macchina.

In base al modello scelto verranno sostituiti solo gli intermediari (P-EASY) oppure anche la staffa sulla tavola superiore (P-TOP).

L'installazione di un sistema pneumatico richiede una centralina pneumatica e un kit (comprensivo di tubi, connettori, cavi e pulsanti di comando).

The Eurogrip upper pneumatic clamping systems replaces some of the standard components supplied with the press brake.

Depending by the chosen model (P-EASY or P-TOP), only the assembly of intermediate body and its clamp will be replaced, or it will be supplied also a new top beam clamp.

The installation of any pneumatic clamping system requires a pneumatic control unit and a pneumatic connection kit (pipes, connectors, cables, switch).

Modello / Model

4392
(P-EASY Z1)

SISTEMA PNEUMATICO EUROGRIP P-EASY:
STAFFA PNEUMATICA ASSEMBLATA SU INTERMEDIO SPECIFICO Z1

EUROGRIP PNEUMATIC SYSTEM P-EASY:
PNEUMATIC CLAMP ASSEMBLED TO SPECIFIC Z1 STYLE INTERMEDIATE

150 mm 5,2 kg

DESCRIZIONE

Assieme completo costituito da una speciale staffa, ad azionamento pneumatico, installata su un intermedio speciale (Z1) di alta qualità, disegnato per alloggiare la staffa maggiorata (vedere 2 e 3 a pag. 219).

Ciascun nuovo intermedio verrà installato al posto di quello esistente utilizzando le staffe già presenti sulla tavola superiore e verrà collegato in serie agli altri tramite tubo in plastica che ne permette lo spostamento orizzontale e la rimozione (tramite bypass). Soluzione raccomandata quando è necessario spostare/rimuovere gli intermediari raramente.

Il codice 4392 è già predisposto per l'installazione delle staffe manuali posteriori opzionali, codice 4404 (fori passanti).

SPECIFICHE TECNICHE

Solo su macchine predisposte ad installare intermedi di tipo Z1 (altezza 100mm; corpo 27mm; asse 7mm): per favore verificare la conformità dell'intermediario esistente a tutte le dimensioni del disegno su questa pagina. Peso= 5,2 Kg

DESCRIPTION

Full intermediate assembly made up of a special pneumatic clamp already installed over a special, superior quality (Z1), intermediate body conveniently machined for the movement of the operating fingers (see 2 and 3 on page 219).

Each new intermediate will be installed in place of the already existing one by utilizing the top beam clamp already mounted on the top beam and it will be connected in series with the others through a plastic pipe that will allow its horizontal shifting and removal (bypass). This is the recommended solution when the intermediate shifting (or removal) operation is required not more than few times a day.

The intermediate assembly code 4392 is already set for installing the optional rear clamp manually operated, code 4404 (pass-through holes).

TECHNICAL SPECIFICATIONS

Only on machines equipped for Z1 style intermediates (height 100mm; body width 27mm; bending axis located at 7mm). Please, verify the conformity of the existing intermediate to all of the dimension shown on the drawing. Weight= 5,2Kg

Modello / Model

4405
(P-EASY Z2)

SISTEMA PNEUMATICO EUROGRIP P-EASY:
STAFFA PNEUMATICA ASSEMBLATA SU INTERMEDIO SPECIFICO Z2

EUROGRIP PNEUMATIC SYSTEM P-EASY:
PNEUMATIC CLAMP ASSEMBLED TO SPECIFIC Z2 STYLE INTERMEDIATE

150 mm 6,0 kg

DESCRIZIONE

Assieme completo costituito da una speciale staffa, ad azionamento pneumatico, installata su un intermedio speciale (Z2) di alta qualità, disegnato per alloggiare la staffa maggiorata (vedere 2 e 3 a pag. 219).

Ciascun nuovo intermedio verrà installato al posto di quello esistente utilizzando le staffe già presenti sulla tavola superiore e verrà collegato in serie agli altri tramite tubo in acciaio che ne permette lo spostamento orizzontale e la rimozione (tramite bypass). Soluzione raccomandata quando è necessario spostare/rimuovere gli intermediari raramente.

Il codice 4405 è già predisposto per l'installazione delle staffe manuali posteriori opzionali, 4404 (fori passanti).

SPECIFICHE TECNICHE

Solo su macchine predisposte ad installare intermedi di tipo Z2 (altezza 120mm; corpo 40mm; asse 20mm): per favore verificare la conformità dell'intermediario esistente a tutte le dimensioni del disegno su questa pagina. Peso= 5,9 Kg

DESCRIPTION

Full intermediate assembly made up of a special pneumatic clamp already installed over a special, superior quality (Z1), intermediate body conveniently machined for the movement of the operating fingers (see 2 and 3 on page 219).

Each new intermediate will be installed in place of the already existing one by utilizing the top beam clamp already mounted on the top beam and it will be connected in series with the others through a steel pipe that will allow its horizontal shifting and removal (bypass). This is the recommended solution when the intermediate shifting (or removal) operation is not required more than few times a day.

The intermediate assembly code 4405 is already set for installing the optional rear clamp manually operated, code 4404 (pass-through holes).

TECHNICAL SPECIFICATIONS

Only on machines equipped for Z2 style intermediates (height 120mm; body width 40mm; bending axis located at 7mm). Please, verify the conformity of the existing intermediate to all of the dimension shown on the drawing. Weight= 5,9Kg

(P-TOP common)

150 mm 1,0 kg

SISTEMA PNEUMATICO EUROGRIP P-TOP: STAFFA PNEUMATICA PER TAVOLA SUPERIORE – PREREQUISITO PER INSTALLAZIONE DI MODELLI P-TOP

EUROGRIP PNEUMATIC SYSTEM P-TOP: PNEUMATIC CLAMP TO BE INSTALLED ON THE MACHINE UPPER TABLE – MANDATORY FOR THE INSTALLATION OF ANY P-TOP MODEL

DESCRIZIONE

Staffa per tavola superiore da installare al posto di quella montata in origine (vedere 1 a pag. 219).

Ogni staffa è collegata in serie tramite tubo in acciaio e trasferisce l'aria in pressione all'intermediario connesso attraverso una valvola interna che ne consente lo spostamento e la rimozione senza necessità di operazioni aggiuntive (bypass).

Soluzione raccomandata quando è necessario spostare (o rimuovere) gli intermediari con frequenza elevata.

DESCRIPTION

It must replace the actual standard clamps installed on the machine top beam (see 1 on page 219).

Each new top beam clamp is connected in series through a steel pipe and transfers the air flow to the connected intermediate by an internal valve that allows to shift the intermediate left or right and even to remove it without the need of any bypass.

This is the recommended solution when the intermediate shifting (or removal) operation must be performed many times a day.

SISTEMA PNEUMATICO EUROGRIP P-TOP: STAFFA PNEUMATICA ASSEMBLATA SU INTERMEDIO SPECIFICO Z1 - RICHIEDE INSTALLAZIONE DI STAFFA PER TAVOLA SUPERIORE 4399

EUROGRIP PNEUMATIC SYSTEM P-TOP: PNEUMATIC CLAMP ASSEMBLED TO SPECIFIC Z1 STYLE INTERMEDIATE - IT IS MANDATORY TO INSTALL THE UPPER BEAM CLAMP 4399

DESCRIZIONE

Assieme completo costituito da una speciale staffa, ad azionamento pneumatico, installata su un intermedio speciale (Z1) di alta qualità, disegnato per alloggiare la staffa maggiorata (vedere 2 e 3 a pag. 219).

Ciascun nuovo intermedio verrà installato utilizzando le staffe 4399 che ne gestiranno l'alimentazione di aria compressa.

L'assieme intermediario 4391 è già predisposto per l'installazione delle staffe manuali posteriori opzionali, codice 4404 (fori passanti).

SPECIFICHE TECNICHE

Solo su macchine predisposte ad installare intermedi di tipo Z1 (altezza 100mm; corpo 27mm; asse 7mm): per favore verificare la conformità dell'intermediario esistente a tutte le dimensioni del disegno su questa pagina.

Peso= 6,2 Kg

Il codice 4398 identifica l'assieme intermedio + staffa superiore (4391+ 4399)

DESCRIPTION

Full intermediate assembly made up of a special pneumatic clamp already installed over a special, superior quality (Z1), intermediate body conveniently machined for the movement of the operating fingers (see 2 and 3 on page 219).

Each new intermediate will be installed in place of the already existing one by utilizing the 4399 top beam clamp that will manage the pneumatic supply.

The intermediate assembly code 4391 is already set for installing the optional rear clamp manually operated, code 4404 (pass-through holes)

TECHNICAL SPECIFICATIONS

Only on machines equipped for Z1 style intermediates (height 100mm; body width 27mm; bending axis located at 7mm). Please, verify the conformity of the existing intermediate to all of the dimension shown on the drawing.
Weight= 6,2Kg

The code 4398 identifies the assembly of intermediate + top beam clamp (4391+4399).

DESCRIZIONE

Assieme completo costituito da una speciale staffa, ad azionamento pneumatico, installata su un intermedio speciale (Z2) di alta qualità, disegnato per alloggiare la staffa maggiorata (vedere 2 e 3 a pag. 219).

Ciascun nuovo intermedio verrà installato utilizzando le staffe 4399 che ne gestiranno l'alimentazione di aria compressa.

L'assieme intermedio 4410 è già predisposto per l'installazione delle staffe manuali posteriori opzionali, codice 4404 (fori passanti).

SPECIFICHE TECNICHE

Solo su macchine predisposte ad installare intermedi di tipo Z2 (altezza 120mm; corpo 40mm; asse 20mm): per favore verificare la conformità dell'intermedio esistente a tutte le dimensioni del disegno su questa pagina. Peso= 6,2 Kg

Il codice 4412 identifica l'assieme intermedio + staffa superiore (4410+ 4399).

DESCRIPTION

Full intermediate assembly made up of a special pneumatic clamp already installed over a special, superior quality (Z2), intermediate body conveniently machined for the movement of the operating fingers (see 2 and 3 on page 219).

Each new intermediate will be installed in place of the already existing one by utilizing the 4399 top beam clamp that will manage the pneumatic supply.

The intermediate assembly code 4410 is already set for installing the optional rear clamp manually operated, code 4404 (pass-through holes).

TECHNICAL SPECIFICATIONS

Only on machines equipped for Z2 style intermediates (height 120mm; body width 40mm; bending axis located at 20mm). Please, verify the conformity of the existing intermediate to all of the dimension shown on the drawing. Weight= 6,2Kg

The code 4412 identifies the assembly of intermediate + top beam clamp (4410+4399).

Modello / Model

4394 (P-HOLD)

835 mm	27,8 kg
624 mm	18,6 kg
415 mm	13,8 kg

SISTEMA PNEUMATICO INFERIORE EUROGRIP P-DHOLD: SUPPORTO AD AZIONAMENTO PNEUMATICO PER MATRICI STILE AMADA

EUROGRIP LOWER PNEUMATIC SYSTEM P-DHOLD: PNEUMATIC DIE HOLDER FOR AMADA STYLE DIES

DESCRIZIONE

Supporto matrici modulare in stile Europeo (Stile Amada/Promecam). Sul lato frontale monta una serie di staffe ad azionamento pneumatico. Ogni modulo si connette al successivo tramite un connettore a scomparsa. Sistema raccomandato per clienti che devono sostituire frequentemente gli utensili inferiori perché consente il blocco/sblocco simultaneo di tutti gli utensili inferiori con la sola pressione di un pulsante.

SPECIFICHE TECNICHE

Installabile su macchine con tavola inferiore piana conforme allo standard stile Europeo (stile Amada /Promecam). Disponibile in moduli con lunghezza 835mm; 415mm; 625mm.

DESCRIPTION

Modular lower die support based on the standard European style (Amada/Promecam style) that carry on its front side a series of pneumatic clamps. Each module connects to the next one through a foldaway connector. This solution is recommended to those customers used to replace frequently the lower tooling because it allows to clamp/unclamp the whole lower table by simply operate a button.

TECHNICAL SPECIFICATIONS

Can be installed on any machine equipped with a lower flat table that conforms to the European style (Amada/Promecam style). Available in modules long 835mm; 415mm; 625mm.

Per gestire i sistemi pneumatici Eurogrip è necessario installare una unità di controllo pneumatica, che contiene la componentistica elettrica e pneumatica per pilotare il sistema, oltre ad un kit, specifico per il modello ordinato, che comprende i tubi, i cavi ed i connettori da utilizzare per installare correttamente il sistema.

In order to manage correctly any Eurogrip pneumatic system is it required to install a pneumatic control unit, that contains the electric and pneumatic system components necessary for driving the system, and to utilize a hardware kit, specific for the ordered system, that includes the supply of the pipes, cables and connectors required for the correct installation of the system

Modello / Model

SISTEMA PNEUMATICO EUROGRIP: CENTRALINA PNEUMATICA LINEA SINGOLA, COMPRENSIVA DI ACCESSORI

EUROGRIP PNEUMATIC SYSTEM: PNEUMATIC CONTROL UNIT SINGLE LINE, ACCESSORIES INCLUDED

DESCRIZIONE

Si connette alla sorgente di aria compressa disponibile in officina (pressione minima ingresso 6 Bar). Gestisce la pressione in uscita verso il sistema di connessione tramite una sola uscita per pilotare solamente un sistema di connessione (superiore o inferiore). Contiene i circuiti di controllo e di sicurezza.

DESCRIPTION

It connects to the job shop pressurized air supply (minimum input pressure 6 Bar).

It manages the output pressure to the clamping system through only one output connector (only upper or only lower).

It contains all of the electrical connections and the safety system.

DESCRIZIONE

Si connette alla sorgente di aria compressa disponibile in officina (pressione minima ingresso 6 Bar). Gestisce la pressione in uscita verso il sistema di connessione tramite due sole uscite per pilotare entrambi i sistemi di connessione (superiore e inferiore). Contiene i circuiti di controllo e di sicurezza.

DESCRIPTION

It connects to the job shop pressurized air supply (minimum input pressure 6 Bar). It manages the output pressure to the clamping system through two output connector (upper and lower).

It contains all of the electrical connections and the safety system

2000 mm	80,0 kg
1000 mm	40,0 kg
500 mm	20,0 kg

PER MATRICE / FOR DIE
3190

9018

SPECIFICO PER ATTACCO WILA / TRUMPF
WILA / TRUMPF DEDICATED TANG

9016

2000 mm	212,0 kg
1000 mm	106,0 kg
500 mm	53,0 kg

PER MATRICE / FOR DIE
3191

9019

SPECIFICO PER ATTACCO WILA / TRUMPF
WILA / TRUMPF DEDICATED TANG

9014

2000 mm	396,0 kg
1000 mm	198,0 kg
500 mm	99,0 kg

PER MATRICE
FOR DIE
3192

9017

2000 mm	600,0 kg
1000 mm	300,0 kg
500 mm	150,0 kg

PER MATRICE
FOR DIE
3242

OGNI MODELLO DI MATRICE RICHIEDE UNO SPECIFICO SUPPORTO
EACH DIE REQUIRES THE PROPER SUPPORT

3190

1050 mm	133,0 kg
1000 mm	125,0 kg
550 mm	72,0 kg
500 mm	64,0 kg
250 mm	34,0kg

Angolo minimo di piega / Minimum bend angle = 30°

Apertura V / V width = min 24mm – max. 124mm

F Max = 125 Ton/m at 90°

#9015; #9018 (pag 243)

3191

1050 mm	180,0 kg
1000 mm	170,0 kg
550 mm	96,0 kg
500 mm	86,0 kg
250mm	44,0kg

Angolo minimo di piega / Minimum bend angle = 60°

Apertura V / V width = min 65mm – max. 180mm

F max = 200 Ton/m at 90°

#9016; #9019 (pag 243)

3192

600 mm 360,0 kg

Angolo minimo di piega / Minimum bend angle = 60°

Apertura V / V width = min. 120mm – max. 300mm

F Max = 400 T/m at 90°

#9014 (pag 243)

3243

600 mm 560,0 kg

Angolo minimo di piega / Minimum bend angle = 60°

Apertura V / V width = min 150mm – max. 400mm

F Max = 600 Ton/m at 90°

#9017 (pag 243)

COPPIA DI SUPPORTI PER PELLICOLE / TESSUTI
PROTETTIVI
COUPLE OF SUPPORT FOR PROTECTIVE SHEET / FABRIC

4309

2,0 kg

PELLICOLA DI POLIURETANO ANTIGRAFFIO
SCRATCH-RESISTANT POLYURETHANE FILM

4308

Spessore / *thickness* = 0,5 mm
Larghezza / *width* = 105 mm
Lunghezza / *length* = 33 m
Peso / *weight* = 1,7 kg

4314

Spessore / *thickness* = 0,8 mm
Larghezza / *width* = 95 mm
Lunghezza / *length* = 33 m
Peso / *weight* = 2,7 kg

TESSUTO PROTETTIVO PER PREVENIRE E
RIDURRE ENTITÀ DI MARCATURE SU LAMIERA
PROTECTIVE FABRIC FOR AVOIDING / LIMITING
THE ENTITY OF MARKS OF THE SHEET METAL

4379

L = 5 m / 0,4 kg
L = 10 m / 0,8 kg
Spessore / *thickness* = Max 3 mm

4380

L = 5 m / 0,4 kg
L = 10 m / 0,8 kg
Spessore / *thickness* = Max 6 mm

4306

SQUADRE DI RIFERIMENTO
REFERENCE SQUARES

3,0 kg

4307

SQUADRE DI RIFERIMENTO ORIENTABILI
ADJUSTSABLE REFERENCE SQUARES

3,5 kg

GONIOMETRO MANUALE PER LA MISURAZIONE DI ANGOLI INTERNI ED ESTERNI CON LA MINIMA INTERFERENZA
MANUAL PROTRACTOR FOR MEASURING INTERNAL AND EXTERNAL ANGLES WITHOUT INTERFERENCE

4883

TRIPLA MODALITÀ DI LETTURA
THREE SETS OF READING

PRECISIONE ACCURACY	DIMENSIONI DIMENSIONS	UNITÀ GRADUATION	MATERIALE MATERIAL
+/- 0,2°	L = 255 mm H = 80 mm	1°	ACCIAIO INOX 1,2 mm

MODALITÀ DI UTILIZZO
HOW TO USE

MISURA ANGOLO INTERNO
INTERNAL ANGLE MEASUREMENT

MISURA ANGOLO ESTERNO
OUTSIDE ANGLE MEASUREMENT

CALIBRO DIGITALE PER LA MISURA DI SMUSSI A 45° E DI RAGGI
DIGITAL GAUGE FOR 45° CHAMFERS AND RADIUS

4384

Utilizzabile per misurare le dimensioni di smussi a 45° e di raggi
Il pulsante C/R commuta fra misura di smusso (c) e di raggio (r)
Possibilità di effettuare misure assolute e relative
Definizione del punto 0 in qualsiasi posizione
Pezzo campione \varnothing 20 mm per calibrazione compreso nella confezione

*Measures a small 45° chamfer and radius.
The C/R toggles between chamfer and radius measurement
Absolute and relative measurement functions are available
Zero setting at any point
Setting master pin gauge for calibration included*

MISURAZIONE <i>MEASUREMENT</i>	Smusso a 45° su angolo retto; raggio esterno di piegatura. <i>45° chamfer on a square corner; outer corner radius.</i>	
GAMMA DI MISURAZIONE <i>MEASUREMENT RANGE</i>	Smusso su angoli 45° (C) Raggio su angoli 90° (R) Raggio su angoli acuti ≤ 89° (R)	0,01 - 15,00 mm 0,01 - 25,00 mm 0,06 - 25,00 mm
	<i>Chamfer on angle 45° (C)</i> <i>Radius on angle 90° (R)</i> <i>Radius on acute angles ≤ 89° (R)</i>	<i>0,01 - 15,00 mm</i> <i>0,01 - 25,00 mm</i> <i>0,06 - 25,00 mm</i>
RISOLUZIONE <i>RESOLUTION</i>	0,01 mm	
TOLLERANZA <i>ACCURACY</i>	Smussi = +/- 0,05mm <i>Chamfer = +/- 0,05mm</i>	Raggi= +/- 0,08mm <i>Radius= +/- 0,08mm</i>
MATERIALE <i>MATERIAL</i>	Acciaio inox <i>Stainless steel</i>

8201

FOSFATAZIONE

Trattamento superficiale che aumenta la resistenza alla corrosione

PHOSPHATING TREATMENT

Surface treatment able to increase the corrosion resistance

8205

NITRURAZIONE

Trattamento di indurimento superficiale che aumenta la resistenza all'usura, alla fatica e agli intagli.

NITRIDING TREATMENT

Surface hardening treatment able to increase the tool resistance to wear, to fatigue, to notches.

8202

NITRURAZIONE + FOSFATAZIONE

Indurimento superficiale + resistenza alla corrosione

NITRIDING TREATMENT + PHOSPHATING

Surface hardening + corrosion resistance
